THE EFFECTIVE ANTIMICROBIAL ABSORBENT FOAM DRESSING WITH SAFETAC® TECHNOLOGY

- Minimizes pain and trauma at dressing changes\(^1,2\)
- Rapid and sustained antimicrobial activity\(^3\)
- Gentle adherence with better conformability and comfort
- Does not slip under dressing retention and may easily be cut for customization

**Safetac® technology layer**
- Reduces pain and trauma during dressing change\(^1\)
- Does not adhere to the moist wound bed but to dry skin only
- Seals the wound margins and reduces risk of maceration\(^3\)

**Polyurethane foam pad**
- Absorbs exudate
- Conformable
- May be used under compression

**Polyurethane backing film**
- Breathable
- Moisture proof
- Bacteria and viral barrier\(^†\)

**Powerful silver performance**
- Antimicrobial activity within 30 minutes and sustained effect for up to 7 days\(^4\)

Also available in heel configuration

*Safetac® technology: Less pain and less trauma.*

*Safetac® is a patented adhesive technology that minimizes pain to patients and trauma to wounds. Safetac technology is available exclusively on Mölnlycke Health Care dressings, including Mepilex®, Mepitel®, Mepiform® and Mepitac®.*

How to use Mepilex® Ag

Clean the wound area. Cut for customization, if desired. Remove the larger release film.

Mepilex® Ag should overlap the wound bed by at least 2 cm onto the surrounding skin. Apply the adherent side to the wound. Remove the shorter release film and mold the dressing in place. Do not stretch.

Hold Mepilex® Ag securely in place with a light bandage or other dressing retention method (e.g., Tubigrip®, Tubifast®, etc.)

How to use Mepilex® Heel Ag

Clean the wound area. Cut for customization, if desired. Remove the larger release film.

Fix the dressing under the foot. Remove the shorter release film. Mold the dressing around the heel and bring edges together. Mepilex® Heel Ag should overlap the wound bed by at least 2 cm onto the surrounding skin.

Hold Mepilex® Heel Ag securely in place with a light bandage or other dressing retention method (e.g., Tubigrip®, Tubifast®, etc.)

How Mepilex® Ag dressings work

Mepilex® Ag is a soft and highly conformable antimicrobial foam dressing that absorbs exudate and maintains a moist wound environment. The Safetac® layer seals the wound edges, preventing the exudate from leaking onto the surrounding skin, thus minimizing the risk of maceration. The Safetac® layer ensures that the dressing can be changed without damaging the wound or surrounding skin or exposing the patient to additional pain. Mepilex® Ag inactivates wound related pathogens within 30 minutes with sustained effect up to 7 days. By reducing the number of microorganisms, Mepilex® Ag may also reduce odor.

Benefits of Mepilex® Ag

- Minimizes pain and trauma at dressing changes
- Stays in place allowing easy application of compression or retention bandages
- Well suited for use under compression bandages
- May be cut to suit various wound shapes and difficult-to-dress locations
- Promotes patient comfort during wear
- May remain in place for several days depending on the condition of the wound
- May be adjusted without losing its adherent properties
- Low potential for skin irritation and allergy

Areas of use

- Moderately exuding wounds
- Leg and foot ulcers
- Pressure ulcers
- Under compression
- Graft and donor sites
- Traumatic wounds (e.g., skin tears and secondary healing wounds)

Wear time: Up to 7 days

Precautions

- Do not use on patients with a known sensitivity to silver.
- Do not use Mepilex® Ag or Mepilex® Heel Ag during radiation treatment or examinations e.g., X-ray, ultrasound or diathermy.
- Do not use Mepilex® Ag or Mepilex® Heel Ag together with oxidizing agents such as hypochlorite solutions or hydrogen peroxide.

Areas of use

- Lower extremity ulcers
- Pressure ulcers
- Diabetic ulcer

Microbes larger than 25 nm

Packaged sterile in single packs
